

# AbleBridge Document Manager for Microsoft Dynamics CRM

## Logical and familiar storage of documents within Microsoft Dynamics CRM

The unstructured method of storing documents in Microsoft Dynamics CRM "out of the box" isn't ideal for most organizations. And implementing Microsoft SharePoint for document management requires integration and more functionality an organization might need. AbleBridge Document Manager provides you with a familiar interface for managing files and folders so you can create logical document libraries – right in Microsoft Dynamics CRM.

- » Familiar Windows Explorer interface with no learning curve.
- » Folder Templates allow for the auto-creation of pre-defined folder structures for each record of any given CRM entity.

- » Stores document files in the database and takes advantage of the integrated security and search capabilities of Microsoft Dynamics CRM
- » Email documents right from Microsoft Dynamics CRM for quick distribution of stored documents.

"We store our carrier plan summaries, contracts and commission statements right in CRM. It's a big productivity gain for our users"
